

## **APPENDIX F - TIME CODE READER INTERFACE**

The DAPSII shall interface to the Wallops CDA Station NASA 36-bit standard time format. The DAPSII and all parts thereof shall be maintained to this standard. Should the NASA 36-bit time standard signal not be available time on the system shall be consistent. The DAPS shall, as a minimum, contain two (2) time code inputs compatible with this time format standard. The government will make available two outputs from the CDA Station timing system.
